ANTECEDENTES

Neglected Tropical Diseases (NTDs) continue to cause hardship and harm to over one billion people worldwide, burdening individuals, families and communities who are already marginalized and disadvantaged.

This course provides practical ideas, tools, and examples to enable each of us to take One Health action towards the global goal of substantially reducing the burden of NTDs by 2030.

OBJETIVOS DEL EVENTO

- Describe what One Health is;
- Justify the importance of a paradigmatic shift towards a One Health approach to NTDs;
- Provide some examples of One Health actions that each of us can take;
- Identify how to start and improve the design and implementation of One Health action;
- Acknowledge how to drive sustainable impact, by working with local communities and by unlocking political interest.

CONTENIDO Y ESTRUCTURA

One Health is an integrated, unifying approach that aims to sustainably balance and optimize the health of people, animals and ecosystems. By recognizing that the health of humans, domestic and wild animals, plants, and ecosystems are interdependent, this approach is particularly relevant to Neglected Tropical Diseases (NTDs), which often involve the environment or animals. This course provides information and practical guidance on how to apply One Health action to NTDs, by presenting some of the most common challenges, but also examples of how to successfully overcome them through a transdisciplinary, cross-cutting, and whole-of-society approach.

PÚBLICO OBJETIVO

The target audience of this course is everybody concerned about health issues at the human-animal-environmental interface and, in particular, program managers and anybody else (such as NGOs) involved in NTDs or One Health-related activity at the international, national, and local levels.

INFORMACIÓN ADICIONAL

Approximate course duration: 3.5 hours.

Content Warning: This course may contain images, videos, and multimedia materials related to healthcare that may include graphic depictions of medical conditions, surgical procedures, and other clinical content. These materials are intended for educational purposes to enhance understanding of real-world medical scenarios and are essential for the comprehensive learning experience.

Viewer discretion is advised. If you find any content distressing, you may pause or skip the material as needed.

Assessment & Awards

You will receive a Confirmation of Participation upon completing all the modules in this course. Please note that this award does not serve as a professional qualification.

Other information

Guidance note

The content of this course has been validated, verified, and is owned by the Neglected Tropical Diseases unit. This course is not a WHO Academy co-produced course. In case of any concerns or feedback on the course content, please share your feedback in the survey form at the end of this course.

Browser and device compatibility

For the best experience, we recommend using the latest version of Chrome, Firefox, Safari, or Microsoft Edge to access the courses.
