### ARRIÈRE PLAN

Artificial intelligence is becoming a key pillar of the future, yet various methodologies, ideas, and misinformation are circulating without much clarity on the correct and beneficial applications and implementations of AI within a country. While regulation is crucial, it is equally important for countries and their officials to understand the state of AI and its impact on current and future governance, commerce, the economy, and education. This webinar is designed to

provide a clear plan and vision for the future, demystifying confusion and dispelling myths about outdated or false forms of AI. It offers a strategic approach to embracing this revolution and succeeding in its new beginnings. As countries independently adopt and transform with their unique lessons and successes, this webinar serves as a platform to unify efforts, ensuring we learn from each other and avoid repeating mistakes, paving the way for a collaborative and successful global future.

*This free webinar is a prelude to the UNITAR Geneva Workshop on Artificial Intelligence (AI): The State of AI in 2024 -- Developing an AI Strategy and Leveraging AI-driven Innovation for Sustainable Transformation. Link: <https://event.unitar.org/full-catalog/unitars-ai-masterclass-leading-ai...>*

***This event will be facilitated by Mr. Vedant Ahluwalia:***

*Vedant Ahluwalia is a global Artificial Intelligence prodigy and well-known figure contributing across global conglomerates, top universities, and governments across the world including the White House. He holds a Master's from Stanford University where he was part of the prestigious Stanford AI Lab in research. He has worked with top names in the field and has done commendable work in building talent and activating the AI revolution across many countries including a Center in Baramati India inaugurated and supported by the erstwhile second richest man according to Forbes of the world Gautam Adani. He currently is focused on pioneering products in Education, Agriculture and Health focused on bringing the AI first version of each therewith and enabling the transformation of countries to be best equipped for this time to come. He has conducted specialized trainings on demand for various governments, business leaders, and organizations across the globe.*

## OBJECTIFS DE L'ÉVÉNEMENT

The objective of the webinar is to gain a glimpse into the transformative impact of AI on the world, exploring how it is reshaping governance, commerce, and jobs.

## CONTENU ET STRUCTURE

The webinar will cover to following topics:

- The World of Artificial Intelligence
- The Key Drivers
- What can we achieve with AI?

## **MÉTHODOLOGIE**

Live webinar. A Certificate of Participation will be issued to those who have fully participated in the 1-hour webinar and have responded to our survey questions.

## **AUDIENCE VISÉE**

Key Government officials, ministers, development practitioners, and decision makers, corporate representatives, and any other personnel in education, and other fields.

## **INFORMATIONS SUPPLÉMENTAIRES**

This webinar is free of charge. Registration is required. Zoom link will be sent to registered participants one week before the event.
