ARRIÈRE PLAN

Ensuring sustainability of NTD interventions and outcomes is a key goal of the NTD road map 2021-2030, as achieving the 2030 targets set for control, elimination and eradication will require substantial effort and new approaches in terms of organization, management, and financing of NTD programmes. Addressing sustainability issues need time and resources. This course helps countries to get prepared by presenting an action-oriented approach to assess sustainability of national NTD interventions, develop an action plan, and mitigate risks.
