BACKGROUND

This public health-focused webinar was held to raise awareness about cervical cancer and promote early detection practices as part of sustainable healthcare. The session aimed to align health education with the Sustainable Development Goals, particularly SDG 3 (Good Health and Well-being) and SDG 5 (Gender

Equality).

EVENT OBJECTIVES

- Raise awareness about cervical cancer and its early detection within public health frameworks
- Highlight effective prevention strategies for reducing cervical cancer incidence
- Empower women and health professionals with timely knowledge
- Promote community engagement on preventive health as a sustainable development strategy

TARGETED AUDIENCE

Students, nursing and healthcare professionals, women's health advocates, general public, and educators in health sciences
