

### Planet

Type:	Course
Location:	Web-based
Duration:	1 Days
Programme Area:	Environment, , Climate Change
Website:	<a href="http://www.unccelearn.org/">http://www.unccelearn.org/</a>
Price:	\$0.00
Event Focal Point Email:	unccelearn@unitar.org
Partnership:	UN CC:Learn Partnership, UNDP, Swedish Development Cooperation (SIDA)

### BACKGROUND

**IMPORTANT: Please register directly on the course website:**

<http://unccelearn.org/>

Climate information and services (CIS) are defined as information and services that are used to inform decision-making on climate change adaptation and mitigation. CIS can be provided in a variety of ways, including through government agencies, private companies, and non-governmental organizations (NGOs). CIS can be used to help governments and businesses to understand the risks of climate change and to develop strategies to reduce those risks. CIS can also be used to help communities to prepare for and respond to the impacts of climate change.

The United Nations Development Programme (UNDP) is a leading organization in the field of climate information and services. UNDP has been instrumental in helping governments and businesses to understand the risks of climate change and to develop strategies to reduce those risks. UNDP has also been instrumental in helping communities to prepare for and respond to the impacts of climate change. UNDP has a number of programs and services that are focused on climate information and services, including the Climate Information and Services (CIS) program. The CIS program is a multi-year program that is designed to help governments and businesses to understand the risks of climate change and to develop strategies to reduce those risks. The CIS program is also designed to help communities to prepare for and respond to the impacts of climate change. (Kit Nicholson)

## LEARNING OBJECTIVES

After completing this e-tutorial, participants will be able to:

- Define climate information and services.
- Identify the uses of climate information and services in development planning and policy.
- Discuss the role of legislation in strengthening climate information and services.
- Provide examples of instruments available to governments for mainstreaming climate information and services.

## CONTENT AND STRUCTURE

The content of this e-tutorial is organized into several sections. The first section provides an overview of climate information and services. The second section discusses the uses of climate information and services in development planning and policy. The third section discusses the role of legislation in strengthening climate information and services. The fourth section provides examples of instruments available to governments for mainstreaming climate information and services. The fifth section provides a summary of the key points discussed in the e-tutorial.

## ADDITIONAL INFORMATION

UN CC:Learn is a partnership of more than 30 multilateral organizations supporting countries to design and implement systematic, recurrent and results-oriented climate change learning. At the global level, the partnership supports knowledge-sharing, promotes the development of common climate change learning materials, and coordinates learning interventions through a collaboration of UN agencies and other partners. At the national level, UN CC:Learn supports countries in developing and implementing national climate change learning strategies. Through its engagement at the national and global levels, UN CC:Learn contributes to the implementation of Article 6 of the UNFCCC on training, education and public awareness-raising, and the 2012-2020 Doha Work Programme. Funding for UN CC:Learn is provided by the Swiss Government and UN partners. The Secretariat for UN CC:Learn is hosted by the UN Institute for Training and Research (UNITAR).
